

## GENERAL PURPOSE GRANULATOR

IM.TYP 42/50

## APPLICATIONS

Stand alone or in-line medium range granulators for recycling of all plastic products and scraps. Optional tangential rotor housing for efficient size reduction of hollow body blow moulding products. Universal, straight, staggered, guillotine or clamping vedge type rotor options for different applications such as thick walled pipes, extrusion waste purgings, film and fibers, bottles.

Hydraulic jack opening of the hopper and rotor housing is a standart item. Optional components such as integrated sound insulation cabins, conveyor feeds, wet applications for washing/drying recycling lines, dust separators provide flexibility to requirements and cost effectiveness.
